

MUSEUM STUDIES MUSEUMS AT NOON

Please join us for a **Museums at Noon** presentation!

Speaker: Taylor West (PhD candidate, Ecology & Evolutionary Biology)

When: 12:00 pm on December 2

Where: Online via [Zoom](#) (Meeting ID: 967 1734 9337 / Passcode 598980)

Digitizing the Dodo: Three-Dimensional Digitization for Research and Public Outreach at the Oxford University Museum of Natural History

The Oxford University Museum of Natural History began a large redisplay project in April of this year, with the goal of developing and installing 20 new permanent exhibits in the main court of the Museum. I traveled to Oxford University for my UM Museum Studies practicum to digitize these new displays using structured light scanning technology to create interactive, 3-D models of the objects located within the new exhibits. This project aims to improve both public access to the OUMNH museum space and also begin a digital collection for researchers at Oxford University and beyond.
